

AFRICAN AURA MINING INC.

African Aura Mining Inc. was born in October 2009 when Mano River Resources merged with African Aura Resources with a 75:25 shareholder base, respectively. The Company is incorporated in British Columbia and is listed on the TSX-V (AUR) and on London's AIM (AAAM). African Aura is focused on the development of world-class gold and iron-ore deposits in sub-Saharan Africa and has an impressive African exploration and development portfolio.

**BANRO CORPORATION**

Banro (TSX & NYSE AMEX: BAA) recently began construction of its wholly-owned Twangiza gold mine located near the city of Bukavu in the Democratic Republic of the Congo. Slated for completion in December 2011, this "phase 1" gold operation is designed to produce 100,000 + ounces of gold per year, with further expansion of the plant to 300,000 + ounces of gold per annum planned for future years. Twangiza has Proven and Probable Reserves of 4.54 million ounces Au, with multiple new gold targets identified for future drilling. Banro's pipeline includes three additional, wholly-owned properties, each with mining licenses, along the 210 km Twangiza-Namoya gold belt in the DR Congo. In addition to its current properties, which cover 2,600 square kilometers, Banro in 2007 was awarded 14 exploration permits covering 3,130 square kilometres. The Company's award-winning charity, the Banro Foundation, which invests in social and economic development at communities near Banro's operations, recently completed a major cycle of projects that includes the construction of two high schools, a health care centre and a potable water system serving 18,000 people, the rehabilitation of over 100 kilometres of roads and bridges, support for HIV/AIDS education and the shipment of a 20 foot container of medical equipment from Canada to seven regional health clinics in South Kivu province.

www.banro.com

**CAMEROUN MINISTRY OF INDUSTRY, MINES AND TECHNOLOGICAL DEVELOPMENT**

Cameroun's mineral resources include bauxite, cobalt, uranium, gold, granite, iron ore and nickel. Cameroun holds one of the largest cobalt deposits in the world, being developed by Geovic of the United States. Sundance of Australia is also developing an iron deposit containing 2.5 billion tonnes of iron ore within what is considered to be an emerging iron ore province with similar deposits in the Republic of Congo and Gabon. C&K of Korea is developing an important diamond deposit while Dubai of Dubai and Hindalco of India are developing the second largest bauxite deposit in Africa.

**CANADA-SOUTH AFRICA CHAMBER OF BUSINESS**

The Canada-South Africa Chamber of Business is a dynamic and influential business organization dedicated to promoting and developing business interests between Southern Africa and Canada. The Chamber provides a focal point for establishing business contacts and networking opportunities, and advancing common interest agendas for a diverse and vital membership with an interest in Southern Africa.

www.canadasachamber.com

**GABON MINISTRY OF MINES, PETROLEUM & HYDROCARBONS**

The Republic of Gabon offers mining investors a number of advantages:

- A wide range of mineral resources including diamonds, gold, base metals, niobium, phosphate, barites and potash.
- Good infrastructure
- A politically stable country with a pro-investment government
- Available geological studies and data

www.legabon.org/uk

**GFMS WORLD GOLD LTD.**

GFMS World Gold is an independent, mining equities research company formed as a joint venture between GFMS, the world's foremost precious metals consultancy, and World Gold Analyst, the gold mining industry's leading independent information source and investment aid.

The company's flagship publication is the long-established World Gold Analyst. In addition, the company publishes the popular series of comprehensive regional reports into gold exploration and development and undertakes independent research into companies producing or exploring for precious metals worldwide.

www.gfmsworldgold.com

**GOLDEN VALLEY MINES LTD.**

Golden Valley Mines typically tests initial grassroots targets while owning a 100% interest and then seeks partners to continue exploration funding. This allows the Company to continue its generative programs and systematic exploration efforts at other majority-owned grassroots projects. As of February 3, 2010, the Company holds majority property interests in 153 projects consisting of 3,883 mining claims (229,327 hectares) and 6 projects consisting of approximately 1,413 km in the Republic of Sierra Leone.

Macleod Dixon LLP

MAURITANIA MINISTRY OF MINES AND INDUSTRY

Mauritania hosts a favourable geological environment, which contains a diverse range of mineral products, such as gold, copper, diamonds, iron ore, phosphates and sulphur.

Currently, most exploration is focussed on diamond and gold exploration. The Mauritanian Ministry of Mines has appointed the South African Council for Geoscience to undertake and co ordinate the PRISM project (Projet de Renforcement Institutionnelle de Secteur Minier). The PRISM project aims to accelerate growth in the Mauritanian mining industry through updating the geological infrastructure through carrying out mapping and airborne geophysics.

MDM ENGINEERING

MDM Engineering has a 22-year track record in process design, engineering and project execution in a wide range of commodities, primarily across Africa. MDM's technical team have designed and built some 52 metallurgical process plants, and completed some 85 feasibility studies; 54 of which have been bankable. At MDM we conduct business with a willingness to look beyond the expected. Our attention to detail and lateral problem solving skills inherent in all we set out to do provides us with technical innovation and unlocks superior economic value for our clients.

"Two thirds of the earth's surface is water ... the rest we can process!"

www.mdm-engineering.com

**MIDLANDS MINERALS CORPORATION**

Midlands (TSX.V:MEX) is a growth oriented value based gold exploration company operating in Ghana and Tanzania, two stable, low risk countries with a history of gold mining. The Company mitigates potential risk to investors by operating in two safe countries with well established mining laws, and by having several high quality projects located on trend with major gold deposits and on known prolific gold producing belts.

Midlands' priority project is the fully permitted and past gold producer, Sian gold project. Sian and the contiguous Kwahu Praso, are located on the prolific Ashanti Gold Belt, just 30 km north east of Newmont Mining's +8.7 million oz Akyem gold deposit. Sian has a 30 year mining lease, and is a fully permitted past open pit gold producer (2001-2004) with existing infrastructure, roads, power, water, including a CIL plant and a recently upgraded NI 43-101 compliant mineral resource estimate.

www.midlandsmineals.com

**MINEAFRICA INC.**

MineAfrica is a business development company providing the premier platform for mining companies, advisors and service providers and governments to promote themselves to a senior level audience of analysts, financial institutions, mining executives and media with an interest in Africa. This is done through our Investing in African Mining in Toronto, Vancouver and London, UK and our Africa Investor Series in Toronto. We also provide business development, marketing and consulting services.

www.mineafrica.com

**MINTEK**

Mintek, South Africa's national mineral research institute, is one of the world's leading organisations specialising in mineral processing, extractive metallurgy and related areas. Working closely with industry and other research institutions locally and internationally, Mintek develops and transfers innovative, new and improved technology to industry for processing, extracting, refining and utilising minerals and mineral products.

Mintek's mandate is to serve the national interest through high calibre research, development and technology transfer which promotes mineral technology and fosters the establishment and expansion of small and medium industries in the field of minerals and products derived from them.

**REPUBLIC OF SENEGAL**

Senegal: an ideal mining investment destination for all investors

Senegal is politically, socially stable and has excellent infrastructure, skilled human resources as well as a competitive, attractive, clear, transparent, simple and modern fiscal and regulatory regime and security of investments. Senegal offers great varieties of mineral substances including noble metals (gold and platinum), base metals (iron, copper, chromium, nickel), industrial minerals (industrial phosphates, limestone, salts, barytine etc.), heavy minerals (zircon and titanium), decorative stones and building materials. Phosphates historically dominated Senegal's economy, however a new mining code adopted in 2003 and an aggressive promotion campaign by the government and its development partners has led to the development of gold, iron ore, uranium, zircon and titanium.
